

NOUGA

Redefining tall fescue

- Super soft leaved
- Highly digestible
- Strong regrowth and autumn vigour
- High dry matter production
- Oceanic type making for easier management
- Compatible with companion species, especially legumes

Utilise in high production systems where perennial ryegrass is struggling to persist due to environmental conditions, particularly heat and/ or insect pests.

Feed available

Being an oceanic type, Nougá's spring growth resembles a slightly growth curve compared to the typical big spring peak of a continental type, making it much more manageable

Stock suitability

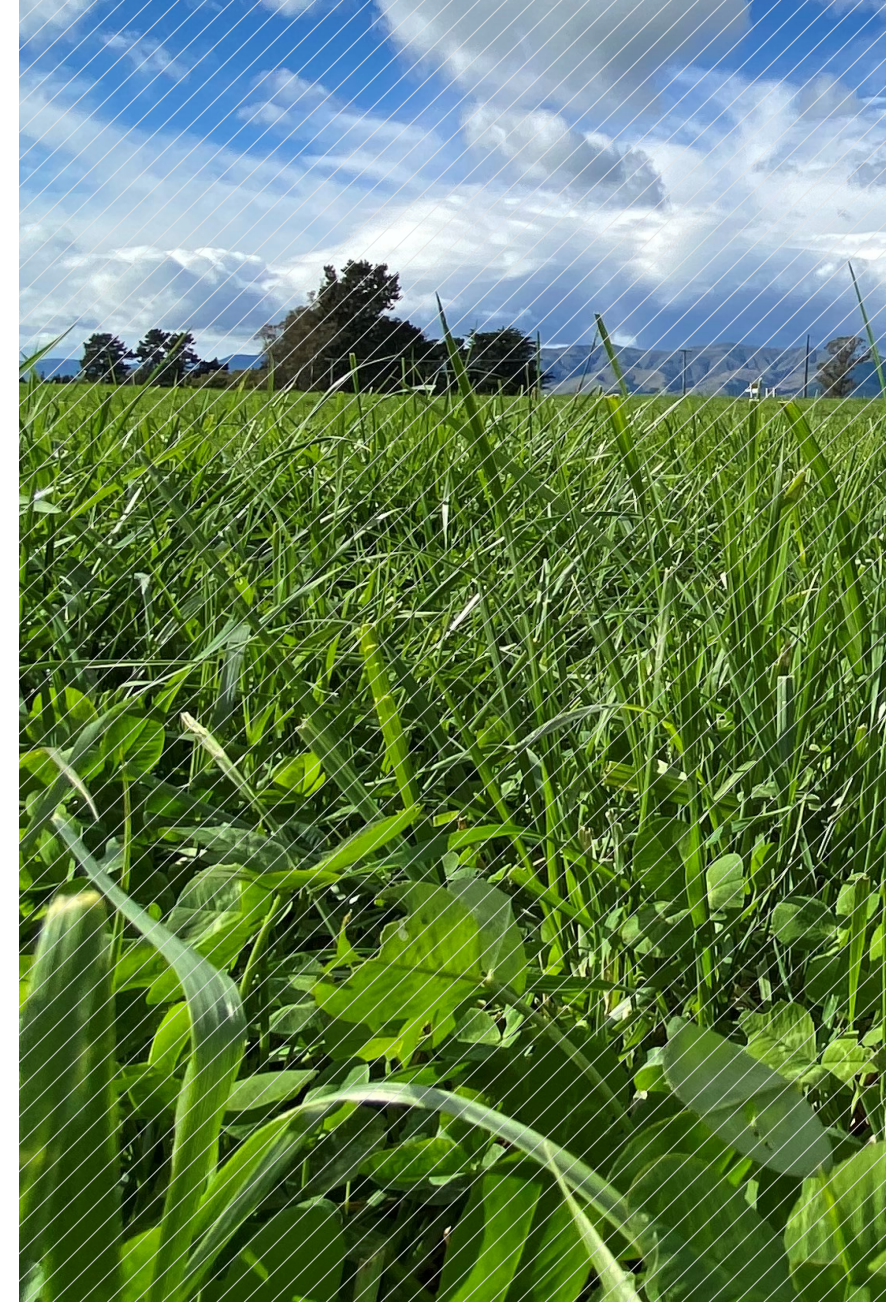

All stock types

Sowing rate

20 - 30 Kg/ha

Depending on companion species
