

TOBBY

WHITE CLOVER

- High production large leaf clover
- Ideal companion for perennial grasses in a range of farm systems
- Very good frost tolerance

- Available bare or ForceCote™ treated

COMPANION SPECIES

TOBBY

WHITE CLOVER

GROW THOSE GAINS

In addition to its inherent high productivity, incorporating Toby white clover can boost both the quantity and quality of grazing pastures. White clover can fix up to 30kg N/ha for every 1000kg dry matter/ha grown.

THE PERFECT PARTNER

White clover is the most commonly used legume in New Zealand as it's well understood, reliable and suited to a range of systems. As climate and regulatory pressures increase, legumes such as Toby white clover will continue to be fundamental for optimising farm performance.

EXCELLENT FROST TOLERANCE

Minimises the adverse effects on white clover's survival and production, particularly during late autumn or early spring frosts.
